

The Carbon Chronicle

VOLUME 35: No. 16

ACME, ALBERTA, THURSDAY · MAY 24th, 1956

\$1.50 a Year; 5c a Copy

Mr. and Mrs. Walter Schacher and family spent the weekend at Banff.

Mr. and Mrs. Dusty Poxor and children spent the weekend at Edmonton.

Mrs. Len Poxon has returned home after her recent operation. Mrs. Poxon was accompanied by her daughter Mrs. Lea Mona Smith of Cranbrook.

We are pleased to say Mr. Tom King is back and meeting old friends on the street. Tom seems to be quite recovered and his old self again.

Mr. and Mrs. Dale Poxon spent the holiday weekend at the home of their sister and brother-in-law, Mr. and Mrs. Ross Orton at Cranbrook, B.C.

Jimmy Foster was a holiday visitor at the home of his parents. Also Mrs. E. (Grandma) Foster of Calgary at the home of her son and daughter-in-law, Mr. and Mrs. Ed Foster.

Mr. and Mrs. Gus Gieck spent the weekend in Lousana.

Patsy Poole was a patient in the Drumheller hospital this past week.

Mrs. J. G. Roberts had the misfortune to sustain an impacted fracture of her arm in a fall Wed. evening.

Mrs. Mary Milligan of Edmonton spent a couple of days at the home of her daughter and son-in-law, Mr. and Mrs. Dale Poxon.

Carbon Little League team continued their winning ways by shutting out Swallow 18-0. The winning battery was Buck McCracken to "Chewy" Wood with nine strikeouts in five full innings of play.

"Hook Arm" Esau was the powerhouse at bat with a single double, triple and a 3-run homer through centre field. "Duke" Dieder came through in the 4th with a smash fielding play and a payoff sacrifice bunt. Glen Brost snagged a hot grounder and rifled it to old reliable Mancell who took it for the out.

The boys play big league baseball. See you at the next game.

Carbon Legionaires were fortunate to come out on top with a score 5-3 against Ghost Pine. Fizzel had the Carbon boys handcuffed except for Brost and Viens. Carbon got five unearned runs by errors and taking advantage of smart base running.

Rookie Hanson was a little wild and was pulled to have Allan Dechenne put out the fire. In the third Dechenne got into trouble but reliever Smoky Viens got the nod from the bullpen and saved the day for Carbon. Continued on back page

20 ACRE FARM FOR SALE in town of Carbon. 3-roomed House. Large barn can be used to store 8,000 bushels grain. Price \$2000.

Young Man with a Plan

One of these days, Fred's going to take over the farm. Meanwhile, he's planning; studying and working hard... learning right on the job.

Already he's learned a lot about modern farm management, and how a chartered bank can play its part in making farm living more comfortable, more profitable. He has found, for example, how useful the bank can be as a place to build up savings, to obtain credit, to seek financial advice and market information. He knows that the bank manager's door is open to everyone.

When you see a good-looking, well-run farm, chances are the farmer uses the services the chartered banks have built up for all Canadians.

THE CHARTERED BANKS SERVING YOUR COMMUNITY

GARDEN NOTES—

Changes needed in lawn care when summer heat comes

When real summer heat comes, one should make a few changes in the regular lawn care. Grass is a cool and moist loving plant and in most parts of Canada it is not likely to get that sort of weather in July and August. It won't make much growth when the thermometer goes much above

75. In consequence one should cut less often in hot weather and also set the mower higher. And even if we remove the clippings earlier in the spring, it is a good plan to let them lie where they fall in the summer. They will make a mulch which, with the longer grass, will protect the roots from the burning sun.

Early summer, when the nights get fairly warm, is the best time to apply the chemical weed killers. Used with reasonable care it is amazing how these will wipe out dandelion, plantain and most broad leaved weeds. One should cover the whole lawn but one must be careful to miss any flowers or shrubbery because these sprays will seriously damage if not kill them.

For a real job one should always repeat the spraying in about three weeks to a month's time. This second application will catch those weeds which have sprouted from seed since the first treatment. It is best to keep one sprayer for this weed killing business only, otherwise one must be most careful to wash machine and nozzle thoroughly before using for any other purpose.

Keep planting

There is a strong temptation when the weather really turns warm to get out and dig and plant the whole garden on a single afternoon. Experienced people, however, restrain that natural urge. They know that there is no great rush and if they spread the planting over several weeks or more, likewise the harvest and the pleasure of gardening will be spread out. Even with flowers, some spreading is desirable as we are thus assured of longer bloom and if the weather suddenly turns against us, we have not lost everything.

With vegetables, the wise gardener will sow standard things like beans, beets, carrots, corn, radish, lettuce, and so on not once but at least three times from two to three weeks apart. In this way there will be something coming along always, and at its best. New, quickly grown vegetables are always the most tender and some of them, like corn and beans, remain only at top quality for a few days.

Flower Planting Hints

Flower varieties such as Asters, Dahlias, Zinnias and Marigolds will be most satisfactory in a soil to which manure or fertilizer has been added, while Poppies, Cosmos, Portulaca, Centaurea, Alyssum and Godetia will give excellent results in poor soil.

If space is available annuals for cut flowers should be grown in a row in the vegetable garden. Among the best varieties for this would be Snapdragon, Aster, Calendula, Annual Chrysanthemums, Gaillardia, Baby's Breath, Sweet Pea, Salpiglossis and Zinnia.

Watch for bugs

With so many easily applied chemical mixtures on the market, there is little if any excuse for having our flowers and vegetables damaged by insects or disease. It is no longer necessary to prepare various concoctions. All that one has to do is to go to the nearest seed store, tell them our troubles and get some handy preparation which is simply dusted or sprayed on. For every bug or disease there is a specific cure or control. The main thing is to start control measures just as soon as the first injury appears. Treatment is not expensive.

Yogi's tattoo business booms

Yogi Ray Davis of Fort Worth, Texas, who has been tattooing people for 42 years, says his business has never been better.

"Everybody's going for it," he said. "The other day I even had a rich old dame sneak into my shop and make me pull down the shades fast so nobody could see her."

"Then she kind of giggled and told me what she wanted. She'd always wanted a rose tattooed on her left thigh. No, I didn't tell her to go to no psychiatrist. I just put the rose on her."

Davis got the name of "Yogi" when he worked in vaudeville, circuses and carnivals. He soon drifted into tattooing, which he has done for most of his life. He is 62.

"I got tattoos all over me, from the crown of my head to the soles of my feet," he said. "I'd have more, but I run out of room."

Two rules

"I got two rules. I won't tattoo nobody unless he's over 18 and sober. Lots of kids try to get around me, but I make 'em show me their draft cards."

"You'd be surprised at the number of women who want a heart or maybe a skull with their boy friend's name on a little flag. It's real popular."

Davis and his wife Angeline, 32, have a nine-year-old son, Ronny. There isn't much danger of his changing his name, because his father tattooed it on him when he was three years old.

Davis said that one of his big problems involves customers who change their minds, come back the next day and say, "I don't like it, take it off."

"Too late for them," he said. "They got to see a plastic surgeon. I don't practise medicine without a licence."

FIRST ACADEMY

The Academy and College of Philadelphia, founded by Benjamin Franklin in 1749, was the first academy in the United States.

Helps You Reduce Swollen Painful Piles

Here is a nice, clean, easy way to get real relief from the nagging distress of swollen, painful piles without the inconvenience of ointments, pills or suppositories.

The secret is in taking just one small Hem-Roid Tablet, with water, two or three times a day. Works through effective INTERNAL action. Quickly eases constipation, relieves itching, soreness and pain. Helps shrink piles and permits them to heal.

Why suffer needlessly when Hem-Roid offers you so much. Get a package today. See for yourself how nice Hem-Roid is to use, how effective it is and how much more comfort it will quickly bring you. All drug stores. Low cost. Money refunded if you are not 100% pleased.

Summer camps for militia and Army Cadets

OTTAWA.—Plans are now complete and preparations are being made for summer camps for militia soldiers and Canadian Army Cadets, Army Headquarters has announced.

During the summer of 1955 more than 20,000 soldiers, members of the Canadian Women's Army Corps and nursing sisters of the Royal Canadian Army Medical Corps attended summer camps. More than 5,900 cadets attended summer camps as well.

Special camp bonuses will be in effect again this year. Single militia soldiers who attend camp will receive a \$25 bonus, and wives of married men will receive \$40. This is in addition to their regular army pay scales for time in camp. They must have attended a prescribed number of training periods during the winter months in order to qualify for the bonus at camp.

Popular features last year were CWAC camps, where almost 900 women took outdoor training. The CWAC camps will continue this summer.

Fashions

Sew-easy separates

4533
by Anne Adams

Separates with a smooth coordinated look—smart fashion any season! This twosome is a cinch to sew; classic blouse in three sleeve versions—favorite full-circle skirt below. Ideal for cottons in gay plaid, check, print!

Pattern 4533: Misses' Sizes 12, 14, 16, 18, 20; 30, 32, 34, 36, 38, 40, 42. Size 16 blouse takes 1 1/2 yards 35-inch fabric; skirt 4 yards.

This pattern easy to use, simple to sew, is tested for fit. Has complete illustrated instructions.

To obtain this pattern send twenty-five cents in coins (stamps cannot be accepted) to:

Anne Adams Pattern Dept.,

60 Front Street W., Toronto.

Be sure to write plainly your Name, Address and Pattern Number.

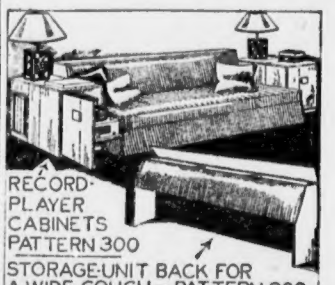

FOR YOUR GARAGE

Lantern cupola atop the roof; storage unit

When you make this glass cupola for the garage the light from the lantern that hangs from the ceiling will be a happy medium between a flood light and a full moon. On the darkest night there will be a friendly glow over the premises. The glass sides are four basement windows. The curv-

ed rafters and the roofing sections are cut from a pattern which includes details for fitting the cupola to the roof. Either a barn or a railroad lantern is wired with fittings from the hardware store. The chandelier weathervane and an American Indian tracing design are on pattern 241. Patterns are 35c each. The Homestead Improvement Packet of five patterns for other valuable outside improvements is priced at \$1.50 post-paid.

STORAGE UNIT BACK FOR A WIDE COUCH—PATTERN 299

This storage unit turns a studio couch or a single bed into a daytime sofa with modern lines. Large detailed drawings on the pattern show each step from making the frame to the finished job as it appears in the sketch. Pattern also carries perspective drawing with diagrams to show how 6 3/4 yards of 48-inch-wide materials may be cut to make a cover for a full length 39-inch wide bed and also for the front of the storage compartment. The upholstery directions will guide the weekend furniture builder to perfect success. Pattern 299 for the storage unit and 300 for the music cabinet are 35c each.

Address order to:

Home Workshop Patterns,
Department P.P.L.,
4433 West 6th Avenue,
Vancouver, B.C.

Overweights disease prone

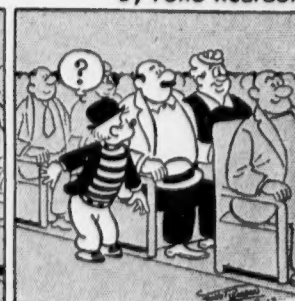

Dr. William Parson of the University of Virginia told the third Ohio Conference on Human Nutrition at Ohio State University that overweight persons are more likely to die of degenerative diseases.

"Studies show that overweight people have 60 percent more heart disease, are 275 percent more prone to diabetes, 50 percent more likely to get cirrhosis and 145 percent more prone to gall stones," he declared.

Don't Neglect Slipping FALSE TEETH

Do false teeth drop, slip or wobble when you talk, eat, laugh or sneeze? Don't be annoyed and embarrassed by such handicaps. FASTEETH, an alkaline (non-acid) powder to sprinkle on your plates, keeps false teeth more firmly set. Gives confident feeling of security and added comfort. No gummy, gooey, sticky taste or feeling. Get FASTEETH today at any drug counter.

Recommended vegetable varieties

OTTAWA—Now is the time to assess vegetable garden seed requirements. Variety in vegetables is as important as in any other crop. Choose those varieties that have proved their suitability and adaptability to conditions in your region.

Each year tests conducted at the Melfort Experimental Farm, Canada Department of Agriculture include most of the new and improved varieties and strains of vegetables, and from these tests the following list of recommended varieties has been established.

Asparagus—Mary Washington.
Rhubarb — MacDonald, Early Sunrise, Canada Red.

Onions (perennial)—Egyptian.
Beans, Wax Podded — Pacer, Round Pod Kidney Wax; Green Podded — Rival, Bountiful, Top Crop; Broad—Broad Windsor.

Broccoli—Italian Green Sprouting.

Cabbage, Early — Golden Acre, Copenhagen Market; Main—Penn State Ballhead, Danish Ballhead.
Carrot — Scarlet Nantes, Chantenay, Nancy.

Cauliflower — Snowdrift, Snowball.

Celery — Utah, Golden Self Blanching.

Citron—Red Seeded.

Corn, Early—Dorinny, Banting, Spangcross; Mid season to late—Seneca 60, Sugar Prince, Marcross.

Cucumber, Table — Straight 8, Early Fortune; Pickling — Early Russian, Mincu, Chicago Pickling.
Leeks—Musselburgh.

Lettuce, Leaf — Grand Rapids; Head — Sweetheart, New York, Cornell.

Marrow—White Bush.
Melon, Musk—Honey Rock, Far North; Water — Sweet Sensation, Early Canada.

Onions, Greens — Dutch Sets, Picklers; Bulbs—Red Wethersfield, Sweet Spanish, Prizetaker, Early Yellow Globe; Picklers—Barletta.

Parsley—Champion, Moss Curled.

Parasnip—Short Thick, Guernsey.
Peas, Early—Little Marvel, Tiny Tim; Midseason—Lincoln, Selkirk; Late—Stratagem, Onward.

Peppers, Sweet — King of the North, Harris Earliest.

Potatoes, Early — Warba, Bliss Triumph; Main Crop—Irish Cobbler, Nettle Gem.

Pumpkin—Sugar.
Radish — French Breakfast, Cherry Belle, Comet Saxa; Long—Iceberg.

Spinach—Bloomsdale, New Zealand.

Squash, Winter — Golden Hubbard, Perfection.

Swiss Chard—Lucullus.

Tomato, Non-staking—Mustang, Early Chatham, Beefsteak, Monarch, Meteor.

Turnip—Laurentian.

Senior checkup

After the age of 40, it is as well to take a little extra care of the health. There are some diseases that are more likely to attack those who are growing older and, if neglected, these can become deeply seated and more difficult to cure. Periodic medical checkups will allow the doctor to discover and diagnose any suspicious symptoms and give prompt treatment. The checkup should include careful examination of eyes and teeth. Variety meats, so called, include liver, kidney, brains, heart and tongue, all of which are good sources of iron and other necessary minerals, protein and vitamins. They are also more economical than many other cuts. Economy can be practiced by using powdered skim milk, which contains practically all the food values of whole milk. Liquid from canned or boiled vegetables can be added to soups, vegetable juices and gravies, to enrich them.

Aside from slight variations, United States systems of measures are based on British standards.

3193

CLAIMED 19,000 HEADS

During the four years of the French revolution, the guillotine's sharp blade claimed some 19,000 heads in Paris. It is now in Madame Tussaud's wax museum in London, England.

TEXAS

Texas was believed to come from the Comanche Indian term "tejas", which meant "friends". Captain de Leon, in 1690, named the country Texas. He had been sent by Spain to found a mission there.

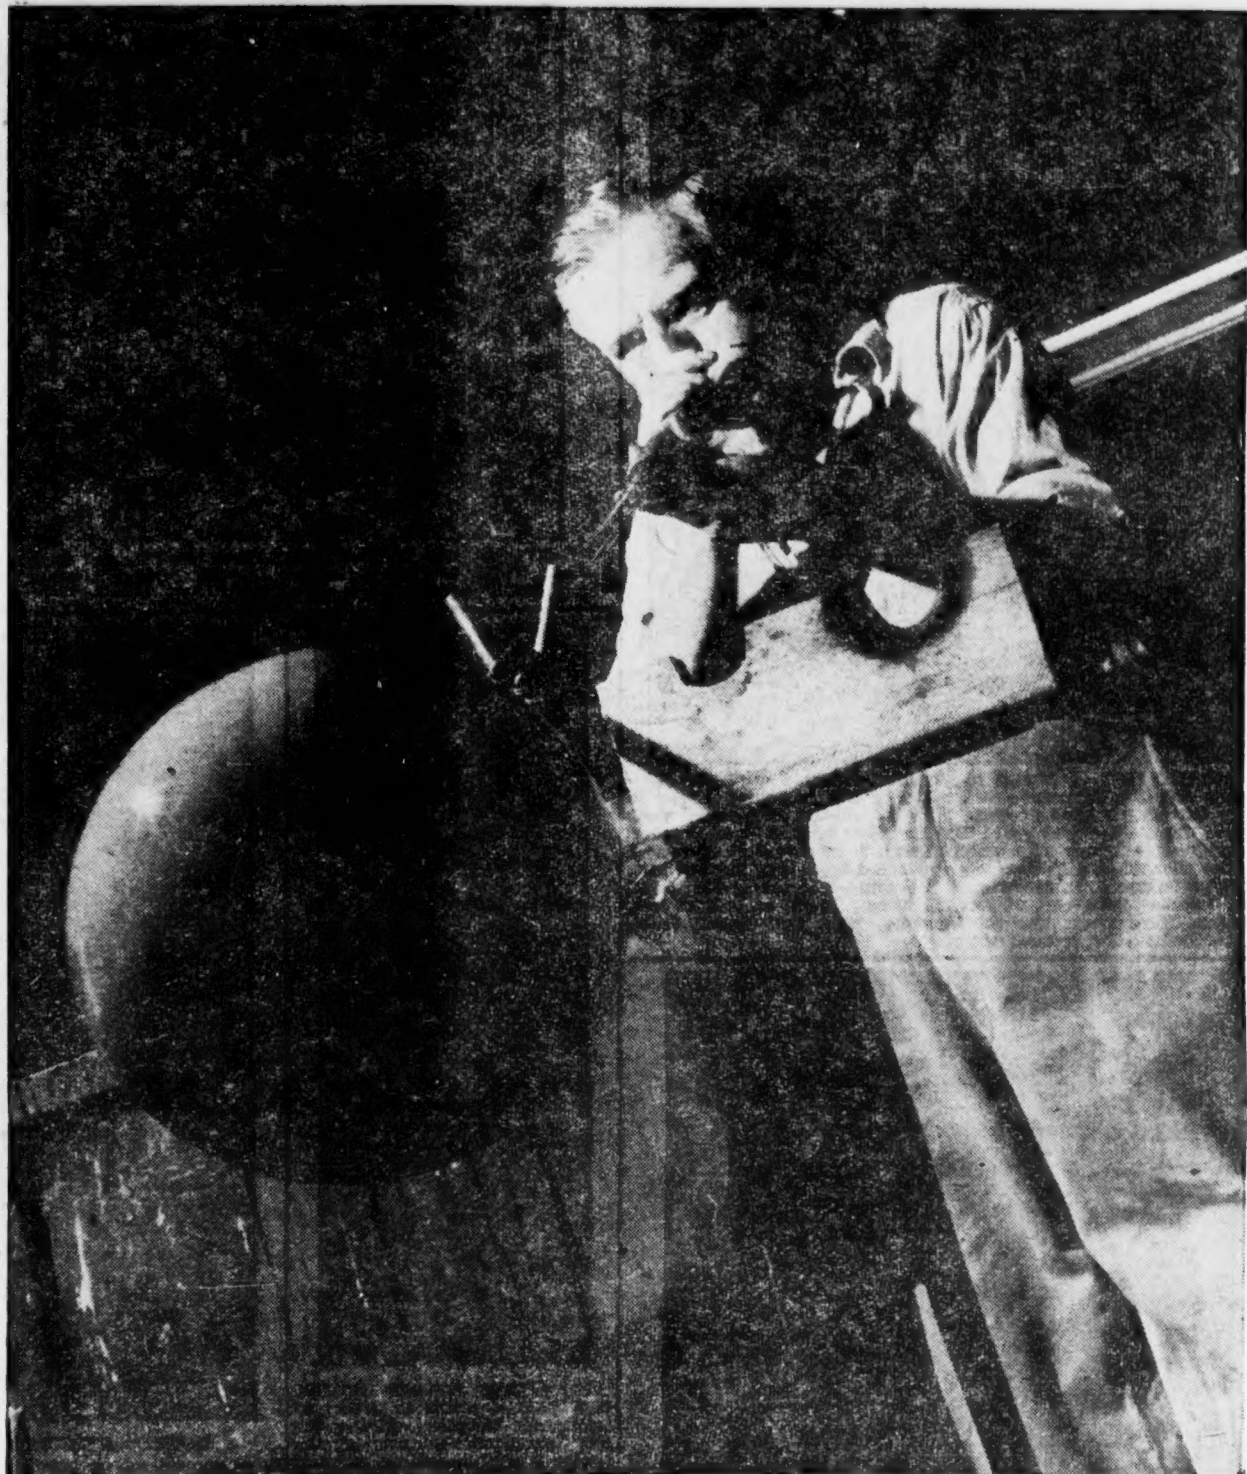

FORBIDDEN TO NATIVES

The gaming tables of Monaco are patronized by people from all parts of the world, but they are forbidden to the natives of the principality itself, in which Monte Carlo is situated.

CONCENTRATION CAMPS

British military authorities in the Boer war instituted concentration camps in 1901, with the object of disheartening fighting troops by collecting non-combatants.

Hand Made Glass Products

The wedding of cheap natural gas, clay and glass has brought about the evolution of Medicine Hat, Alberta, from a cow town to one of the chief centres of the Canadian ceramic industry. With great banks of clay in the surrounding district, Medicine Hat's potteries turn out vast quantities of clay brick, sewer pipe and flue liners

for the building trades, crockery and table ware for the home. A new Company (pictured here) specializes in delicate hand-made glass products. Here, owner John Furch begins to fashion piece from blob of molten glass suspended on four-foot long gathering tube.

National Film Board Photos by Gar Lunney

In shipping room, delicate, handcrafted glass swans are packaged for distribution and sale. This firm, a fairly recent addition to Medicine Hat's ceramic industry, produces about \$100 worth of handcrafted glass products daily, uses over 500,000 cubic feet of natural gas per month in its operations.

Fluted edges are put on finished vase. The only factory in Alberta producing handmade pieces in coloured glass, company was established in Medicine Hat in 1950 by Czechoslovakian craftsman Furch to take advantage of plentiful supply of natural gas. All equipment, including high-temperature furnaces, was built by Furch.

World Happenings In Pictures

SHARP SHIP—Designed to give the enemy a once-over thoroughly, USAF's supersonic Starfighter F-104 has wing edges so sharp that they must be covered with felt shields when crews work around the needle-nosed plane. The Lockheed-built craft is the first production-line fighter ever equipped with a downward ejection seat for the pilot. She's said to climb at a speed approximating her level flight performance. Dimensions of the twin-jet ship are: length, 54 feet, 9 inches; wingspan, 21 feet, 11 inches; height at tail, 13 feet, 6 inches. She's shown over the Edwards Flight Test Center, Calif., in this Defense Department picture.

TOO POOCHED TO PARTICIPATE—Cleo, TV's sad-eyed basset hound, is dog-tired after spending a day with the 11 offspring of her stand-in, "Beauty". Beauty was stunting before the camera at Sun Valley, Calif., to give the star a rest (?).

JUST IN CASE—Tanya Mathis, 18 months old, tidies up in the Hip department just in case her handshaking friend decides on a baby-kissing routine. Sen. Estes Kefauver met Tanya and her mother, Mrs. R. C. Mathis, left, as the Tennessee Democrat attended a "Kefauver for President" rally in Miami, Fla., during his preconvention campaign.

NOW TOP SOVIET NAVAL OFFICER — Admiral Sergei Georgievich Gorshkov, who is the new commander-in-chief of the Soviet Navy, succeeding Admiral Nikolai G. Kuznetsov. Gorshkov formerly commanded Russia's Black Sea fleet.

A MONACO RESIDENT tries to take a peek through a long-focus camera set up outside the palace, but soon learns that she is looking through the wrong end. Throughout the week prior to the Grace Kelly-Prince Rainier wedding, long-focus cameras were trained on the palace in the hope of catching an exclusive picture of the bridal couple.

WANNA BET? — Julius Lewis, of Memphis, Tenn., above, is gambling \$100,000 on the probability that a ballplayer won't clout one through the bull's-eyed knothole of the ball-park fence during team play this year. He says that Lloyd's, the fabulous London, England, insurance firm, takes a cheery view of his enticing ad. They, too, are betting that no one will accomplish the theoretically possible feat.

FISHY FASHIONS — Wicker fishing creels topped with cherries make novel pockets for this eye-catching Italian import of red-and-white polka-dotted material modeled by equally eye-catching Ellen Smith. Crownless hat matches the baskets. Appropriate setting for the creation is the Italian gardens of Vizcaya in Coral Gables, Fla.

FORMER LIEUT. ALDO L. ICARDI is greeted by his wife in Washington, following his acquittal of perjury charges growing out of the wartime slaying of Icardi's commanding officer. He was charged with lying before a House armed services subcommittee which investigated the slaying of Major W. V. Holohan during a daring behind-the-scenes mission in Italy in World War II. The case was thrown out on the grounds that the subcommittee was not functioning as a component tribunal and had no power to require Icardi to tell the truth.

The Sports Clinic

Learn to use a pressure bandage

Every athlete is subject to such injuries as sprains, strains, charley horses, severe bruises, etc. For this reason, every athlete should learn to use a pressure bandage, because its an effective way to reduce the severity of such injuries and hasten the healing and recovery process.

Briefly, the idea is this. A piece of foam rubber, felt or cotton batten is pressed tightly against the injured area as soon as possible after the injury and held tightly in place with tape or elastic bandage. This pressure slows down or even stops the internal bleeding and leaking from broken blood vessels and muscle tissue that always follows such injuries.

In strains, bruises and sprains, it often is this collection of blood and muscle fluid that makes the injury more painful and hard to clear up so that you can get back into action quickly. Ice will do the same thing, but the advantage of a pressure bandage is that it is always easy to apply, while ice is not usually available immediately after the injury occurs. If possible, a combination of the two is best—apply the pressure bandage first, and then soak the injured area in ice and water right over the bandage.

Of course, if the injury is really severe, get to a doctor as quickly as possible after applying the bandage.

A tennis hint from an expert
Mercer Beasley, one of the most successful tennis coaches in the world, has this hint for young players. Beasley claims that a majority of points are lost by hitting

the ball into the net. Says Beasley: "The average player doesn't realize that it just isn't smart to try to just clear the net with his stroke. Too many people worry about hitting the ball beyond the baseline. They should be worrying about hitting into the net."

The best plan is to give the ball lots of air. Try to clear the net by 16 to 24 inches anyway. You'll make less errors, and you'll find that your shots will go deeper into the opposing court, which is a definite advantage.

Sports College has announced a national service for the development of amateur sports and physical fitness in Canada. This newspaper is pleased to participate in this plan by presenting "The Sports Clinic" to its readers in the best interests of this community. Further information about this service may be obtained by writing to Sports College, Box 99, Toronto 1, Ont.

Quick Canadian Quiz

1. What is the minimum age of a Canadian senator?
2. Children are eligible for family allowance up to what age?
3. To pay for its spending on welfare and social security only how much must federal government collect daily in taxes from Canadians?
4. In Canada which is greater, the area of occupied farmland or the area of unoccupied land suitable for farming?
5. Which is greater, the number of Canadians employed in the manufacturing and service industries, or the number employed in the primary industries?

ANSWERS TO QUICK QUIZ

5. Manufacturing and service industries employ 79.6 percent of labor force, primary industries 20.4 percent. 3. Three and a half million dollars daily. 1. For appointment to Senate a Canadian must be at least 30. 4. Unoccupied farmland still greater than land under cultivation. 2. Up to age 16, unless they fail to attend school or are married.

(Material prepared by the editors of Quick Canadian Facts, the pocket annual of facts about Canada.)

Not much fun for a dog here

A new breed of dog—non-barking, non-biting and a respecter of persons and property — is being legislated into existence in Haverford township, Pennsylvania.

Township Ordinance No. 980 prohibits a dog from leading a dog's life. Haverford dogs are forbidden to bark, howl, yelp or make "unseemly noises". And those that step out of line make their owners liable to a fine ranging from \$5 to \$100. They must not damage property, including shrubs, flowers and hedges.

Another use for helicopter

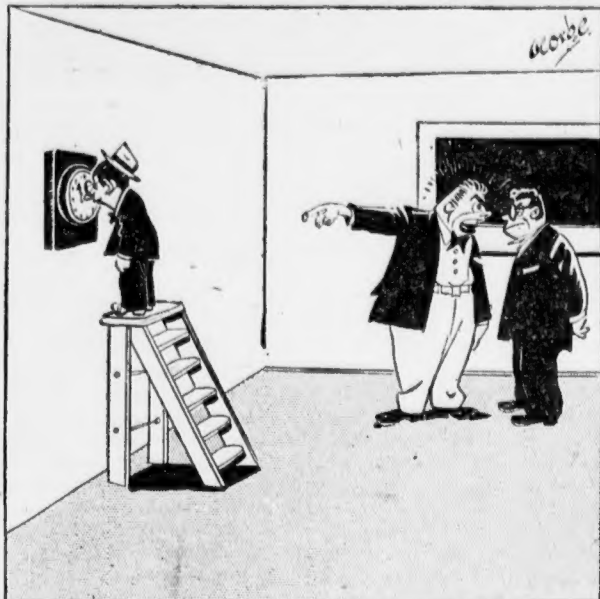

Another use for a helicopter: After a rain, Gene Masterson of Carlsbad, California, commercial flower grower, had one hover over a field of 24,000 blooms ready to be picked for market.

The vibration shook the rain drops off the delicate petals, which Masterson said would have rotted if packed wet. He figured it would have taken several men a full day to shake the rain off the flowers. The helicopter did it in two hours.

WEEKLY BIBLE COMMENT

SUFFERING BRINGS FELLOWSHIP IN CHRIST

When Jesus hung upon the cross, one of the two thieves between whom He was crucified reviled Him, urging Him to save Himself and them. The other thief rebuked his fellow, reminding him they were suffering justly for their misdeeds, whereas Jesus was suffering for His innocence and goodness. The penitent thief had the reward of hearing Jesus say, "This day thou shalt be with me in Paradise."

It is the distinction between two kinds of suffering which Peter emphasizes in his writings that does so much to encourage suffering Christians.

The Christian who suffers is a partaker of the sufferings of Christ. Instead of being embittered, he may well glorify God.

Certainly as we observe life, we can not very well say that the ideal life is entirely free from suffering.

We have seen those who have accepted the way of suffering patiently and in subjection to the will of God emboldened by their experience, finding a deep satisfaction in life often denied to those whose ways have been easier and more pleasant.

Peter brings this philosophy of endurance of suffering into the realm of Christian faith and practice, emphasizing the part of humility and the strength that comes to men through casting all their cares upon God.

The mystery of pain has never been solved. We do not know why the innocent suffer with and for the guilty. We do know, however, that there is a fellowship in Christ's suffering which has brought to suffering Christians happiness and peace. And this, too, is a mystery.

Decoded Intelligram

1—Saratoga. 2—Longer. 3—Will. 4—8th. 5—Republic. 6—Cen-
tenial. 7—Fahrenheit. 8—May. 9—Emerald. 10—Berne.

Check the correct word:

- 1—Nation's newest aircraft carrier is the (Sara-
toga) (Forrestal).
- 2—She is (longer) (shorter) than her sister ship.
- 3—Army-Notre Dame (will) (will not) resume
their grid rivalry this fall.
- 4—Israel recently celebrated the (8th) (18th)
anniversary of her founding.
- 5—Israel is a (republic) (monarchy).
- 6—Colorado is the (Centennial) (Golden) state.
- 7—Your household thermometer is calibrated
with the (Fahrenheit) (Centigrade) scale.
- 8—Mother's Day occurs on the second Sunday
in (May) (June).
- 9—May's birthstone is the (emerald) (diamond).
- 10—(Berne) (Geneva) is the capital of Switzer-
land.

Count 10 for each correct choice. A score of 0-20 is
poor; 30-60, average; 70-80, superior; 90-100, very
superior.

PRINCESS, 15, MAY WED—The Tehran, Iran weekly newspaper, has reported that Princess Shantaz Pahlavi, 15-year-old daughter of the Shah of Iran, will marry Ardeshir Zahedi, engineer son of a former premier. The paper said the engagement would be announced this month. Zahedi is a University of Utah graduate.

OUR COMPLETE SHORT STORY—

Big Jim collects

—By WALTER E. KLEIN

BIG JIM blew a cloud of smoke into the air, reflectively stared at his cigar, then delicately flicked the long ash into a waiting tray.

"I said I wanted the money today," he said, and darted a sharp look at the nervous, pretty girl before him. She sat, small and timid in the big chair, twisting her handkerchief in supple fingers. "And no nonsense, Miss Mary Sharp. I'm not a hard man, but five grand isn't chicken feed. I've got expenses to meet, too. And my creditors won't wait as long as I've waited for you." That was a lie. Big Jim's creditors, if he'd had any, would have waited a good deal longer, and no doubt somewhat more nervously.

"You'll get it, Mr. Moran. I promise you. It's just that I haven't got it now. All I've got is fifty dollars. Look!" and she opened her purse, to reveal a small roll of bills nestling in the bottom, almost hidden by the bric a brac. "If, if . . . you'd take it on . . . on account?"

Big Jim laughed, the roar rumbling out of his throat in a thunderous peal. "Fif . . . fifty dollars . . . on . . . on account for, for five grand? That wouldn't even pay the interest!"

"It's all I've got," Mary said. "Look," Big Jim said, kindly. "Why don't you admit you're licked? What made you marry such a dumb lug for, anyhow? You knew he couldn't stay away from the roulette table. Now all you do is run around and pay off his debts. He's no good."

"This is the last one," Mary said, quietly. "When it's paid, I'm finished. I've taken my case to a lawyer. That's why I haven't got the money right now. But if you'll only wait," she pleaded.

"I see," said Big Jim. "I like you, kid. I feel sorry for you. But if you're dumb enough to play Santa Claus to your husband, well, I have to have the dough. If I don't get it, you know what'll happen to him."

"No! I knew what he was like when I married him, and I feel responsible for him. I can't let you do that! All I need is a little more time . . ."

"That's all anyone ever needs—a little more time."

"Besides," Mary declared, defiantly. "If your tables weren't fixed, maybe he wouldn't have lost."

Big Jim inhaled the fragrance of his cigar, and smiled at her. "Everyone knows my tables are honest. How do you think I keep my clients?"

"I don't care. What difference does it make?"

"I like to keep the facts straight, that's all. Haven't you got anything you can hook?"

Mary shrugged helplessly. "Nothing. Nothing at all. Except . . . except this ring. John gave it to me when we became engaged. And I won't give that up!"

"Knowing John as I do, it's

probably glass anyhow. Keep it. Nothing else? Sure? You're really in bad shape, aren't you kid? John must have really taken you to the cleaners. Now, why not be sensible, and just forget the whole thing? Let me take care of him. I'll get my money's worth out of him; you can bank on that. Big Jim doesn't fool around long with welters!"

"I can't do that! I loved him. All I need is time. In a few months I can pay you back every penny."

Big Jim shook his head. "Sure, and in the meantime John'll be where I can't lay my hands on him, and you'll forget all about it, and these notes I have'll be just waste paper. No dice, kid."

Mary's shoulders slumped as she slowly rose.

"Wait a minute!" Big Jim cried on inspiration. "I'm a gambling man, and I like you. I'll give you a chance I'd never give John, or anyone else. You take that fifty bucks into the next room, and try to work it up on roulette. That's what John lost on."

Mary started to shake her head but Big Jim went on. "Don't be in such a hurry! You know how to play roulette, don't you? Sure. Any wife of John Sharp would. Okay, if you lose, I'll knock off that fifty bucks, and give you another week to dig up the rest. That's a fair offer for you. What more do you want?"

Mary hesitated, then nodded. "All right, I'll do it!"

The door closed behind her.

Big Jim leaned back, put on his hat, and lit a new cigar. He pressed the buzzer on his desk, and talked a few moments with the poker-faced dress suit who entered. Then he went over to a sideboard, and mixed himself a drink. A shout rose in the next room, and Big Jim smiled expansively.

The door banged open, Mary Sharp clicked rapidly in on her high heels, and dumped a pile of bills on the desk before him. "There's your five thousand. I hope you're satisfied!"

Big Jim set down his empty glass, and looked at the money with a rueful grin. Shoving it to one side, he leaned across the desk, and said, "Not bad for a beginner. I hope you don't let it go to your head; it's still a bad business for an amateur. Congratulations."

"Now, if you'll give me those notes, I'll leave."

As the door was closing behind her, Big Jim shouted: "Still think my tables are fixed?" A chuckle pressed up his throat.

The door opened again, and the croupier re-entered. "Well, it's done. She took us for five grand. Was that John Sharp's wife? He owed you quite a wad, didn't he? Just about five grand."

Big Jim grinned. "Something like that. I hope that table doesn't pay out any more tonight."

"It won't, but I'll never see why we had to give five grand to a dame, who isn't even a regular suck . . . client."

"Last days of Pompeii" may be at hand as tourists plunder ruins for souvenirs

By FRANKLIN JOHNSTON
(Correspondent for CPC)

NAPLES, Italy.—The real "last days of Pompeii" finally may be at hand, warns Prof. Amedeo Maiuri who, since 1924, has been in charge of the remarkable excavations of the ancient Roman city.

About three-fifths of the city that was buried by volcanic ash from Mount Vesuvius has been uncovered and constitutes one of the richest archaeological finds in history and one of the tourist "musts" of the world. According to the professor, these diggings are being left unprotected and the priceless relics of Roman life are disappearing.

The elements are to blame for most of the final destruction of the ruins because they are gradually crumbling in the summer heat or dissolving into the lava mud during the rainy parts of the year. Souvenir seekers are getting in their licks also.

If this continues unchecked, the remains that first were found in 1594 and 1600 by the architect Domenico Fontana while he was building a canal will quickly disappear.

It has always been the lament of the excavators of Pompeii that the architects of the city that died A.D. 79 during the great eruption of Vesuvius scarcely a mile away suffers from the inferior quality of the materials generally employed by the original builders. No good building stone was at hand and marble was very scarce. Stucco was the most popular material, often highly colored.

Some outstanding discoveries in the ruins have been removed to museums here, and to Paris and New York. A museum at Pompeii itself, the Villa Iam, contains remarkable life-size frescoes but these are mainly the usual museum fare.

Since 1901, it has been the policy to leave most of the findings at the site and Pompeii has become the world's greatest outdoor museum. Professor Maiuri plans a world-wide appeal to raise funds for building large glass enclosures on the site and he figures it is not too late because about two-fifths of the city are yet to be uncovered.

Pompeii became the most uniquely embalmed city of the ancient world because of the coincidental way in which it was covered up by a huge bed of lighter substances—cinders, small stones and ashes—which fell in a dry state, while at nearby Herculaneum, which suffered the same fate, the substance was drenched and hardened into a sort of concrete 65 feet thick.

Two letters from the Younger Pliny to the historian Tacitus are remarkable on-the-spot accounts like modern news stories of what happened when Vesuvius suddenly blew its top and the lethal cloud settled over the three thriving cities of Pompeii, Herculaneum and Stabiae.

The Younger Pliny had been staying at the villa of the Elder Pliny, who commanded the rescue fleet and died of the fumes at Stabiae.

Pompeii's life was crystallized almost exactly as it was on that fateful day. The loaves of bread were in the ovens; the accounts of a banker were on his desk and a complete farm was entrapped at a nearby suburb.

Most of the 2,000 skeletons found were in the basements of buildings, where some of the inhabitants apparently sought refuge.

They had long since crumbled to dust but one of the most remarkable things was the way the compacted ash formed moulds that enabled plaster casts to be made by the excavators. Truly a bygone civilization was caught in full flood.

Many of Pompeii's great temples were already in ruins from the

"The poor kid's had a tough time, but I couldn't let John Sharp take me for five grand, could I?"

warning earthquake that had struck 16 years earlier but the Pompeians were energetically reconstructing them when the greater catastrophe occurred. It was a plush city even by modern standards.

Strictly Fresh

Secretary we know says she's going to ask for a raise. Her three-hour lunch hours take so much of her time that she has to work as hard as two persons the rest of each day to get her work done.

Fellow across the desk from us says that you don't have to be married in Monaco, where Monte Carlo is located, to find out that marriage is the world's biggest gamble.

Scientists working on guided missiles might well investigate the

principle which governs the affinity of a baseball for a picture window.

We'd like to get our hands on the fellow who bribed the airlines to send low-flying planes over our house right at the most exciting moment of every TV drama.

Friend of our is staying home for two weeks this summer so that he can afford last year's vacation.

32 Fined for failure to pay hospital tax

REGINA.—Thirty-two Saskatchewan residents who recently faced a total of 64 charges of failure to pay the Saskatchewan Hospitalization tax were assessed fines and court costs amounting to \$370.20.

In announcing this, G. W. Myers, executive director of the Saskatchewan Hospital Services Plan said that those facing charges pleaded guilty in each case.

The charges involved residents of Arcola, Brockington, Crystal Springs, Crestview, Carrot River, Carlyle, Dillabough, Fenton, Fillmore, Fort Qu'Appelle, Glen Mary, Goodsoil, Humboldt, Lashburn, Leader, Meadow Lake, Mistatim, Prairie River, Rama, Spalding, Stockholm, Storthoaks, Wakaw, Wapella, Weekes, Wilkie, Waldheim, Watson and Wynyard.

More than 2,000 years ago, Chinese monarchs signed documents with their thumb prints.

ards. Among the Roman nobles with fine villas was Cicero.

After the eruption, the Pompeians tunneled back into their city and removed most of the objects that were valuable by their standards. The very site then was forgotten for centuries.

The really valuable objects that were uncovered by the excavators, however, were the things of daily living in the homes of the common people.

These constitute a priceless cross section of ancient Roman life and they are what are rapidly disappearing today and what Professor Maiuri so urgently wants saved for future generations to see at least as clearly as nature preserved them for this generation.

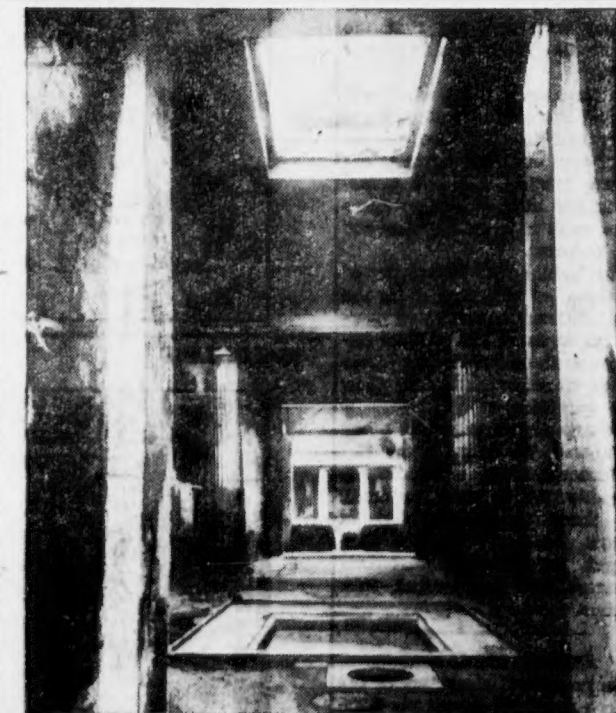

Plant disease control also by rotations

"It's all linked up with sound farm practice," said Dr. L. E. Tyner, head of the Science Service Laboratory of Plant Pathology in Edmonton. He was talking about plant diseases and how losses from them could be reduced with a little care. "Crop rotation is not solely a matter of protecting the soil and maintaining fertility," he said, "plant disease control is also accomplished by rotations."

It is well to remember that our plant diseases are specific, Dr. Tyner pointed out—those that attack one group of plants are harmless to others. The root rots that are so bad on wheat and barley, for instance, are of little consequence on oats. Following wheat or barley with oats offers a chance for the disease organism to die out. Scald of barley is of importance on barley alone, so any other crop following barley could be of advantage.

Ergot, particularly bad on rye, may also take toll of wheat or barley following. Oats are a good crop to use after rye. And about ergot, Dr. Tyner has a special word. Grasses are also susceptible to this disease, and from the grasses ergot can be spread to the grain crops. The time to cut grasses for hay is around flowering, not only for a palatable and nutritious feed but also as an aid to ergot control. If the grasses are cut when in flower, the ergot has no chance to develop and spread.

Alfalfa and clovers in the rotation also help in disease prevention. They have their own diseases, which do not attack the cereals, and cereal diseases do not attack legumes. Alternation of grain crops with hay and pasture provides a sequence in which diseases of one crop are of little consequence to the others. As a result, healthy stands year after year are more likely to be maintained.

Magnificent hall of a beautiful Pompeian villa, believed to have been the home of a wealthy Roman poet.

Funny and Otherwise

Long - suffering Husband - Ruth, you promised you wouldn't buy another new dress. What on earth made you do it?

Modern Eve—Dear, the devil tempted me.

Long - suffering Husband - Well, why didn't you say, "Get thee behind me, Satan?"

Modern Eve—I did, and then I heard him say, "It fits you just beautifully at the back."

"How do you like your new boss, my dear?" asked Jill's mother.

"Oh, he isn't so bad, Mummy; rather bigoted, that's all."

"What do you mean, bigoted?"

"Well, he thinks words can be spelled only one way."

They were sitting on the veranda in the moonlight. No words broke the stillness. She began to yawn.

"I say," she said, suddenly, "suppose you had money, what would you do?"

"I'd travel," answered the bore, closing his eyes dreamily. He felt a small hand in his, and sighed happily. When he looked up again she had gone.

In his hand was the bus fare.

"How come you didn't hold your lodge meeting last night?" one man asked another.

"A little trouble," explained the second. "The Supreme Exalted Grand Potentate's wife wouldn't let him out of the house."

Speeders pay fines by foot

Motorists in Bowling Green, Ohio, will have to pay by the foot for speeding violations under a new system devised by Mayor Lorin Janzer.

The plan calls for a fine of 15 cents per foot for each foot of difference between the safe stopping distance at the speed limit and the safe stopping distance at the speed which the motorist was driving.

ART WITH A PUNCH — Hairy-armed swipe by artist Vincent Pizzitola adds a slam-bang touch to one of his canvases. The New York City artist says that he paints "from the tip of the pinkie to past the elbow." His slapping, punching technique makes it necessary for him to mount canvases on strong wood backing which will stand up under Pizzitola's forceful interpretation of finger-painting.

Issuing two new postage stamps in June

Two new stamps will be issued June 7, 1956, emphasizing the importance of specific industries in Canada. One, based on the chemical industry, will be a 25-cent stamp, red in color and one and one half inches high by one inch in width. The second stamp, based on the pulp and paper industry, will be a 20-cent stamp, green in color, one and one half inches in width by one inch high. The sizes are approximate.

First day covers must be forwarded to the Postmaster, Ottawa 2, Ontario, to arrive not later than June 5, 1956. In view of the high denomination of this stamp, no cover service fee is being charged, the Post Office department circular states.

FAST RAISE

Mrs. Marcia W. Ford, the new secretary to the Waterford, Connecticut, director of administration, received a pay increase before she was officially hired. Board of finance members couldn't find any salary-bracket under civil service rules which paid \$3,000, the amount for which Mrs. Ford was engaged. The board confirmed her appointment at the salary closest to that amount—\$3,032.

Cologne to have first mono-rail

The world's first one-rail railroad is to be built near Cologne this year.

The city parliament has voted to accept an offer from Swedish multi-millionaire Axel Wenner-Gren's Alweg Mono-rail Co. to construct a two-mile section free of charge at suburban Flittard.

Company officials said they trust this test section will help win over the city fathers to approve funds for a projected Mono-rail between Cologne and the town of Opladen—about 11 miles.

Construction costs for the complete Cologne-Opladen railroad, including 24 cars for 100 passengers each, are estimated at \$8,806,000.

Alweg officials say the Mono-rail train can do 100 miles an hour and is safe as a conventional train. It runs on small rubber wheels clinging to a rail-like track of concrete. The smooth surface of the track permits shoeless travel.

It is estimated that the dog was domesticated about 3,900 B.C.

United States navy has own version of the 'rope trick'

The U.S. Navy has developed its own version of the fabled "Indian rope trick" for reliable communications in the remote stretches of the Arctic.

The trick involves suspension of an antenna from balloons trailing about 1,200 feet above a ship. With the vertical or "skyhook" antenna a ship in the icefloes of the Arctic is able to maintain radio contact with land-based radio stations 1,500 miles away.

The Navy turned to the "skyhook" antenna because of the difficulty icebreakers in the Far North had in maintaining radio contact with their short, conventional antennas mounted between masts. Radio communications there are extremely difficult and subject to such interference as ionospheric blackouts, sunspots and electro-magnetic storms.

Experiments in the Arctic indicated that reliable communications could be maintained by using low frequencies around 200 kilocycles. But such frequencies require an antenna about 1,200 feet long—obviously longer than any icebreaker could string out horizontally between masts.

'Skyhook' alternative

The only alternative was a vertical wire or "skyhook" antenna. The Navy gave serious consideration to several devices to lift the antenna wire—including a miniature, remote-controlled helicopter—but finally decided on small zeppelin-type balloons.

The balloons were developed by the Naval Research Laboratory and successfully tested out aboard an icebreaker, the USS Glacier. The balloons, which are raised and lowered by a small electric winch on the icebreaker's deck, are about 30 feet long and designed to withstand the extreme icing conditions and buffeting of the strong winds of the Arctic.

With the balloon-raised antenna system, the Navy expects that ships in the Arctic will have a reliable communications range of about 1,500 miles using a 1,200-foot vertical antenna and a transmitter operating with a power output of 1,500 watts.

The system will have the added

advantage that it can be used for aerological studies and weather observations.

Weather tower is 'fanciest'

Denver, Colorado's fanciest weather-and-time tower has gone into operation atop the National Farmers' Union new 14-story building on Capitol Hill.

The tower contains a 2,000 watt beacon light with red or green plastic sleeves which slide over the light. If the light shines green, the weather will be fair. Red signals bad weather coming.

Four time clocks at the tower's base work from an electronically corrected time machine. Four temperature clocks flash the mercury readings.

There are banks of white neon tubes, each five feet long, running up the tower. If the temperature is rising, the upper portion of the tower is lighted. If the temperature is dropping, the lower banks light.

Canadians make mark in gunnery

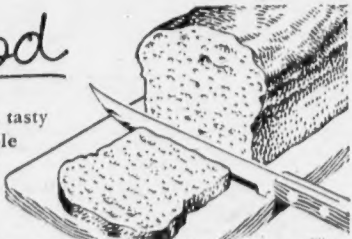

In recent years, Canadians have been making their mark among Commonwealth sailors in the senior gunnery instructor course at H.M.S. Excellent, Royal Naval Gunnery School in Portsmouth, England.

Petty Officer Kenneth Albert Jackson, 35, of St. Thomas, Ont., and Vancouver, is the sixth from Canada to obtain the highest marks in the course. He was awarded the Commander Herbert Llewellyn Prize of £5 and a suitably-inscribed sheepskin document for leading the most recent class on Whale Island, where the famous gunnery school is situated.

The Ku Klux Klan was at the height of its power in the South United States in 1868. 3193

So good

Here's bread with a tasty difference! Dependable Fleischmann's Active Dry Yeast makes it quick and easy!

Rolled-out Bread

1. Measure into bowl
1 cup rolled oats
2 teaspoons salt
1½ tablespoons shortening

Stir in

- 1¾ cups boiling water
and let stand until lukewarm.

2. In the meantime, measure into a large bowl

- ½ cup lukewarm water
2 teaspoons granulated sugar

and stir until sugar is dissolved. Sprinkle with contents of

- 2 envelopes Fleischmann's Active Dry Yeast

Let stand 10 minutes, THEN stir well. Stir in prepared rolled oat mixture and

- ¾ cup lightly-packed brown sugar
2 tablespoons molasses
2 cups once-sifted all-purpose flour

and beat until smooth and elastic. Work in an additional

- 2½ cups (about) once-sifted all-purpose flour

3. Turn out on lightly-floured board and knead until smooth and elastic; place in greased bowl. Brush top of dough with melted shortening. Cover. Let rise in warm place, free from draft, until doubled in bulk—about 1 hour.

4. Punch down dough. Turn out and divide in half. Let rest 15 minutes, then shape each half into a loaf. Place in greased loaf pans (8½ x 4½ inches, top inside measure). Brush with melted butter, margarine or shortening. Cover. Let rise until doubled in bulk—about 45 minutes. Bake in moderately hot oven, 375°, about 50 minutes. Yield: 2 loaves.

Young Men the Army Recruiting Team WILL BE AT CARBON AT THE CARBON HOTEL ON MAY 31ST

Good morning... I'm your Census Taker

When I call at your home during the next few weeks I will have only a few simple questions—the name, age and marital status of those living at your address. If you live on a farm, there are some additional questions about acreage, crops, livestock and equipment.

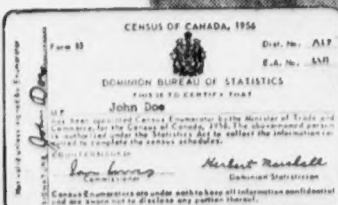

The information you give me will be kept in strict confidence. Every Census worker has taken an oath of secrecy. By Act of Parliament, the personal information gathered by the Census about individual Canadians can be used only for general overall statistics. It cannot be disclosed to any government agency or private organization.

Canada is taking count to keep up with her rapid growth. Census facts are required to meet and plan overall national needs—schools, public utilities, welfare services, farm and industrial production, employment.

The 1956 Census—the essential measure of Canada's growth.

It's a big job—your cooperation will help us do it quickly and accurately.

Every census taker carries this official identification card to show that he or she has been appointed by the Government of Canada to help take the Census. Ask to see it.

NOTICE

The Alberta Liquor Control Act

The Special Committee appointed by the Legislative Assembly at the recent Session for the purpose of reviewing the provisions of the Alberta Liquor Control Act in order to recommend amendments thereto, will receive written briefs from interested persons, groups, and organizations prior to June 1st, 1956.

Representations in support of the briefs submitted by organizations or groups only will be heard commencing June 18th.

Organizations and groups that submit briefs will be advised when to appear before the Committee.

Twelve copies of the briefs should be sent to:
The Clerk of the Legislative Assembly, Legislative Building, Edmonton.

R. Crevelin,
Secretary of Committee.

ATTENTION!

OWNERS AND OPERATORS OF MOBILE CONSTRUCTION EQUIPMENT

Your attention is drawn to the fact that all mobile construction equipment is required to be licensed annually under provisions of the MOBILE CONSTRUCTION EQUIPMENT LICENSING ACT before such equipment may engage in construction work in any town, village, municipal district, county, improvement district or special area in the Province of Alberta.

"MOBILE CONSTRUCTION EQUIPMENT"
(i) means machinery or equipment constructed or manufactured for use in construction work, capable of being moved to its place of use under its own power or by being towed, pulled or carried and not intended to be affixed to realty, and

(ii) includes movable bunk, cooking and dining houses used to serve persons engaged in construction work, but

(iii) does not include trucks licensed under The Vehicles and Highway Traffic Act or The Public Services Vehicles Act, exclusive of mounted equipment on such trucks".

"CONSTRUCTION WORK" MEANS THE OPERATIONS REQUIRED

(i) for screening and washing sand and gravel or for excavating and loading or for breaking and clearing, or

(ii) for the construction or maintenance of a road, sidewalk, building, structure, bridge, culvert, dam, drainage system, irrigation system, airport, pipe line, power line, grades, strip mining, or other work of like nature".

Provision is contained for the imposition of a fine and possible impoundment of equipment where a violation of the Act occurs.

A copy of the Mobile Construction Equipment Licensing Act may be obtained upon payment of thirty-five cents from the office of the Queen's Printer, Highways Building, Edmonton, Alberta.

Address all enquiries regarding MOBILE CONSTRUCTION EQUIPMENT LICENSES to the DEPARTMENT of MUNICIPAL AFFAIRS, Edmonton, Alta.

GOVERNMENT OF THE PROVINCE OF ALBERTA DEPARTMENT OF MUNICIPAL AFFAIRS

HON. A. J. HOOKE,
MINISTER

A. W. MORRISON,
DEPUTY MINISTER
